**POSTMAN TABS:**

Postman tabs are like browser tabs that can be used to navigate from one page to another and we can open 2 work together to check and work on it , its helps you open multiple API request at the same time

EXAMPLE OF HOW POSTMAN APIS TABS CAN BE MAKE USE

Tab 1: you are testing ape endpoint that retrieves the current weather

Tab 2: you are testing on endpoint that fetches weather forecast for the next week

Tab 3: you are setting up request to test weather alerts

EXAMPLE 2:

Tab 1: you have a book delivery system so you are testing one endpoint that is used to add new books

Tab 2: other endpoints to delete the book from the system

Tab 3: Third endpoint to update the details of the books
